Why?

There are many reasons why someone would be interested in becoming a Medical Cannabis Patient. From life threatening illness, chronic pain, or mental health reasons, Cannabis has been used for thousands of years across the world.

Many people are more open to the benefits of cannabis and are enjoying the benefits of the plant more than the chemicals found in pharmaceutical products.

But... Isn't it legal?

Medical Cannabis has been available in Canada since July 2001. 17 years later, Canada became the second country in the world to formally legalize the recreational use of cannabis and its by-products on October 17, 2018.

We at The Cannapothecary are dedicated to aiding patients in accessing all the benefits that come with having a Medical Cannabis License.

TOP 5 REASON TO GET YOUR MEDICAL CANNABIS LICENSE

1. Medical Prescription VS Self-Medication

Learn more about what strains to use, how much to use, and the best methods based on your medical needs with the help of your Licensed Producers (LP). We at The Cannapothecary can help pick the right LP, strains, and methods for your needs.

2. Medical Cannabis Strains, Selection, and Supply

Many LP's offer **Medical Only** strains that are not available on the Recreation side of the industry.

With years of experience, we at The Cannapothecary can help suggest beneficial strains based on your specific health concerns while monitoring progress. With the help of your prescription, The Cannapothecary can process your medication into consumables custom to need, surpassing the legal limits of the Recreation market if needed.

3. Tax Deductible

The CRA allows people with a prescription to submit receipts as medical expenses if through an Ontario approved LP.

4. Medicate as needed with a prescription

With a Medical Cannabis license, you can medicate when and where needed. Make sure you follow the regulations put through by Smoke Free Ontario. Many companies have had to re-look at past drug policies and make amendments to allow for the prescribed use of Medical Cannabis at the workplace.

5. Grow your Medication

Medical Grow Licenses can be applied for at the same time as a Medical Cannabis license. This gives you the opportunity to produce your own medication at the comfort of your own home.

With a Grow License, clients can grow 5 indoor plants for every gram they are prescribed a day. The 4 legal Recreation plants can still be added on top of that amount. For example, 5g/day would equal to 25 medical plants and 4 rec plants. (29 in total)

Indica

Sativa

Ruderalis
